

What does a successful evaluation project need?

introduction

Dear participant!

Thank you very much for your participation in my study.

On the following pages you will, first of all, find a few questions about your person and, subsequently, about the topic of evaluation.

Please respond to each question by ticking off your preferred answer alternative or by writing a few words in the provided spaces.

If there is not enough space for your remarks, please use the back of a page.

When talking about a successful evaluation project: What is that for you? Please put it in a few words

What does a successful evaluation project need?

The following pages deal with successful evaluation projects and the requirements how to accomplish success. For this purpose, I have listed conditions which have been identified by evaluation experts in a recent study.

Please give your opinion in consideration to the two following questions:

- How do you assess these conditions?

- According to your experience: What is the current evaluation practice regarding these conditions?

To answer these questions, several answer alternatives are made available from which you can choose.

How do you assess these conditions?

- 1= without this no successful evaluation project is possible
- 2= very important condition
- 3= important condition
- 4= relevant condition, but you can manage without it
- 5= unimportant condition
- 6= this condition is even counterproductive

According to your experience:

What is the current evaluation practice regarding these conditions?

- 1= receives too much consideration
- 2= receives appropriate consideration
- 3= receives too little consideration

What does a successful evaluation project need?

According to your experience:
 What is the current evaluation practice regarding these conditions?
 1= receives too much consideration
 2= receives appropriate consideration
 3= receives too little consideration

How do you assess these conditions?
 1= without this no successful evaluation project is possible
 2= very important condition
 3= important condition
 4= relevant condition, but you can manage without it
 5= unimportant condition
 6= this condition is even counterproductive

What does a successful evaluation project need?

Regarding the fields you mainly gained experiences: Are there any further important conditions which are not listed in this questionnaire? If yes, which one?

Do you know any other persons who might be interested in participating in this study? If yes, can you give me the names including email-addresses? (alternatively: give them the URL of my study - many thanks for that!)

Do you have any further comments or wishes (e.g. regarding the feedback of the results)?

THANK YOU VERY MUCH!
